TANDBERG's Point of Care Solution designed by medical Professionals

The TANDBERG Clinical Presence System is designed by medical professionals for medical professionals. Connecting clinical staff and patients for specialist consults has never been easier. TANDBERG's legendary quality, ease of use and reliability are maximized specifically for a medical environment. With flexible options, the Clinical Presence System can be customized to meet your specific requirements

- AC powered and rechargeable battery versions available
- Multiple options available including
  - 802.11B/G Wireless Ethernet
  - Wide variety of storage modules designed for medical devices, laptops, PCs, keyboards, and light sources
  - Adjustable scope holders and ancillary storage pods
  - Disposable splash guard
- Available in single or dual monitor configurations
- 1080p capable system with PrecisionHD 12x optical zoom camera and 24" LCD monitor
- Powered by the TANDBERG Codec C40
- System pending CSA C22.2 No. 601.1 and UL 2601-1

Researched and developed with direct input from clinical healthcare professionals:

- **Height adjustable** — full electronic worm drive provides accurate, variable height adjustment of platform, monitor and camera
- **Clinic-friendly** —
  - Camera and display assembly rotate for patient viewing and easy transport
  - Dedicated high output audio amplifier/speakers for use in high-noise environments
  - Four hospital grade AC outlets to power peripheral devices
- **Flexible connections** —
  - Multiple audio, video and high resolution inputs and outputs to enable connection of medical devices and external displays
  - Connection for 2nd PrecisionHD controllable camera
  - Waist height for ease of access
- **Intuitive, simple to operate tactile membrane control** on front panel with storage for standard TANDBERG remote control
- **Modular** — multiple options for storage are interchangeable and can be added anytime

Multiple modular storage options

Disposable splash guard
